Envi Blocks - The Friendly Firewood

An all wood product made from dry, clean and recycled hardwood sawdust and shavings. For use in wood stoves, fire places, fire pits, wood furnaces.

ENVI BLOCKS COMPARED TO MOST CORDWOOD

- **More Heat** - Higher density
- **Burn Hotter** - Lower moisture content
- **Burn Cleaner** - Less ash residue - Less particle emissions - Less creosote
- **Less Mess** - No insects - No dirt - No fungus - No mold
- **Convenient** - Occupies less space - Easier to store - Can be stored inside
- **Saves Time** - Less handling - No seasoning - No splitting

INSTRUCTIONS / WARNINGS FOR USAGE OF ENVI AND ENVI-8 BLOCKS

- Use inside only properly maintained and ventilated wood burning stoves, fireplaces, and furnaces.
- We recommend you consult the manufacturer of your wood burning appliance on use of this product.
- To Start - establish a bed of coals using kindling before adding 1 or 2 blocks.
- Add additional blocks as appropriate for the size of your wood burning appliance.
- Maintain the desired temperature and burn time by adjusting air flow and spacing between blocks.
- Avoid overheating by controlling air and not over filling your fire box.
- Do not stack blocks too close to glass doors/windows of stoves, fireplaces.
- Store in Dry Place.

What are Envi Blocks?

These blocks are an all wood product with no additives which are specifically designed to be used as firewood in **wood stoves**, fireplaces, fire pits and wood furnaces. **Envi Blocks** are made of the same material (hardwood sawdust, shavings, etc.) as our wood pellets, but are mechanically compressed into larger block sizes. The **Envi Block** is approximately 4" x 4" x 10 1/4" in size with an average weight between 6 and 7 pounds. The **Envi-8 Block** measures approximately 3 1/4" x 2 3/4" x 9 1/2" with an average weight between 3 and 4 pounds. Both the **Envi** and the **Envi-8** are packaged and sold in pallet quantities.
